

THEME PARK AND RESORT

Introduction

Due to rapid economic development, Asia has become a hot spot for tourism and resort developments. As theme parks and resort facilities expect a large volume of visitors, a set of complete, efficient and premium transport accessibility and servicing facilities (Coaches, Public Transport, Taxis, Private Car and Rail Road based transport) are essential.

MVA has extensive experience in implementing conceptual and scheme design. We are able to provide a complete set of traffic transport design specific to theme parks and resort facilities, keeping in mind the needs of developers, architects, planners, and engineers. Services provided by MVA are as follows:

- Extend road infrastructure planning
- Public transport service planning
- Internal road planning and circulation system design
- Vehicle flow forecast
- Vehicle lane design
- Car park circulation system design
- Car park management and control system design
- Tour bus/coach and private car parking design
- Boarding/alighting design of bus, tour bus and taxi
- Passenger flow desire line design and public management
- Visitor demand forecast
- Crowd management and control system design
- Emergency measures
