

## MVA - Corporate Overview

MVA, a SYSTRA Group company, is a leading transport planning and traffic engineering specialist consultancy in Asia. MVA set up its regional head office in Hong Kong in 1978, with permanent offices in Beijing, Shanghai, Shenzhen, Singapore, Bangkok and project offices in Ho Chi Minh City and other Asian cities.

MVA offers a complete range of professional consultancy services in traffic engineering, transport planning, and business market research. Working closely with public and private sectors including governments, NGOs, operators, financial institutions, development fund agencies, developers, investors, architects, planners, engineers, and contractors. MVA is experienced in providing consultancy services from initial concept stages, through planning, feasibility, detailed design to construction.

## MVA in Vietnam

MVA has been involved in several prestigious transportation projects in Vietnam. Projects have been undertaken on behalf of both public and private sector clients, including major strategy studies sponsored by overseas funding organisations. MVA's Vietnam project office regularly works with local firms, combining international local expertise, knowledge, and experience.

## Transport Forecasting in Vietnam

Through involvement on previous projects, MVA has developed up-to-date and detailed multi-modal transport forecasting models for both Ho Chi Minh City and Hanoi. The models are suited to a wide range of applications on future development and transport infrastructure projects in and around the two principal cities.

## Recent Key Project Experience in Vietnam

### Ho Chi Minh City Metro Line 2

MVA's involvement in Ho Chi Minh City's Metro Line 2 includes station planning, transport planning, traffic masterplanning and traffic engineering.

MVA developed land and transport integration measures for the major metro line proposed for Ho Chi Minh City, allowing for global climate and local environmental impacts.

### Ho Chi Minh City Green Transport Development Project - Bus Rapid Transit

MVA's "Green-corridor" demonstration project was a design of a BRT network for CNG vehicles to decongest the streets of Ho Chi Minh City.

The scope of works included site investigations and preliminary activities; detailed design, bill of quantities and cost estimates; and procurement plan, bidding documents and support.

### VHAS Hoi An Master Plan Project

MVA was part of the Master Layout Plan study team for generating the development plan, traffic and transport concepts, and strategy for the project.

The area of the Hoi An South is designated as a strategic tourism-oriented region to be comprised of resorts, hotels, retail, entertainment, theme parks, gaming, and residential land uses, as well as housing for local populations and community support facilities.
